simplify your lifestyle

convenience

convenient bedside control of your lights

Turn any room into a relaxing retreat with soft, subtle lighting. From the comfort of your bed, press one button to control the lights in and around your home—no need to walk from room to room to control each light.

Tabletop Master Control** — plug into a standard wall outlet to control all system lights from anywhere in the home.

-  Press a button to turn individual room dimmers off—or on, to their locally set slider levels
-  Turn all dimmers on to 100%
-  Turn all dimmers off

simple to install

The AuroRa® system installs as quickly and easily as five light switches. Your system comes complete, ready to use, no programming required.

Simply replace switches with AuroRa dimmers, then, for remote control of your lights, plug in the tabletop master control and clip the wireless controller to the car visor.

The central antenna ensures reliable RF communication between all system components. It can be plugged into a standard wall outlet and placed discreetly in a closet or under a bed.

Discover the benefits of AuroRa wireless lighting control.

Simple to install...
Easy to operate... Pre-programmed to work right out of the box.

- AuroRa dimmers install as easily as light switches
- One system controls 5 areas of light
- Press a button—create a safe path of light into, and throughout your home
- Patented RF technology—ensures reliable communication between system components

easy to use

Control lights from each dimmer for individual room control, or adjust multiple lights at the touch of a button using the wireless controller or tabletop master control.

saves energy

Dimming your lights saves electricity and extends the life of your light bulbs. For example, if you dim your lights 50%, you can save 40% on electricity and extend the life of your light bulbs up to 20 times.

Suggested dimmer locations:

- 1 front entry
- 2 garage exterior
- 3 hall/foyer
- 4 kitchen
- 5 family room
